CINCINNATI, OH., November 18, 2008 — Streamline Health Solutions, Inc. (NASDAQ CM: STRM) announced today that it will release third quarter of fiscal year 2008 financial results for the period ended October 31, 2008 on Tuesday, December 2, 2008 after the market closes. The Company will hold a conference call and web cast to discuss the results on Tuesday, December 2, at 4:30 p.m. ET.

Interested parties can access the call by dialing (877) 356-5706 or (706) 679-3820, or can listen via a live Internet web cast, which can be found at www.streamlinehealth.net. A replay of the call will be available by visiting www.streamlinehealth.net for 30 days or by calling (800) 642-1687 or (706) 645-9291, access code 70446458, through December 5, 2008.

About Streamline Health Solutions, Inc.

Streamline Health is a leading supplier of workflow and document management tools, applications and services that assist strategic business partners and healthcare organizations to improve operational efficiencies through business process optimization. The Company provides integrated tools and technologies for automating document-intensive environments, including document workflow, document management, e-forms, portal connectivity, optical character recognition (OCR) and interoperability.

The Company's workflow-based services offer solutions to inefficient and labor-intensive healthcare business processes throughout the revenue cycle, such as chart coding, abstracting and completion, remote physician order processing, pre-admission registration scanning and signature capture, insurance verification, secondary billing services, explanation of benefits processing and release of information processing. The Company's solutions also address the document workflow needs of the Human Resource and Supply Chain Management processes of the healthcare enterprise. All solutions are available for purchase or through a remote hosting services model that better matches customers' capital or operating budget needs.

Streamline Health's solutions create a permanent document-based repository of historical health information that is complementary and can be seamlessly integrated with existing disparate clinical, financial and administrative information systems, providing convenient electronic access to all forms of patient information from any location, including secure web-based access. These integrated solutions allow providers and administrators to link existing systems with documents, which can dramatically improve the availability of patient information while decreasing direct costs associated with document retrieval, work-in-process, chart processing, document retention, and archiving.
